

CALFMAX

CALFMAX is a formulation of minerals, both trace and macro, vitamins, Bovatec and Benelac. Apart from the inclusive list of ingredients required for health and growth, Benelac's contribution of MOS and Beta Glycan play dramatic roles in minimising the risk to calves, so often exposed to *E. Cole* and salmonella. The yeast cell wall in Benelac will also foster the growth of digestive bacteria in the calf's digestive tract.

We chose to use Benelac in products being mixed with milk or water rather than Lactamuun due to the yucca content of Lactamuun not being soluble. We do use Lactamuun in all calf grain mixes for its added benefits where solubility is not a concern.

CONTENTS

VITAMINS	MINERALS	OTHER
Vitamin A	Iron	Biotin
Vitamin D3	Manganese	Folic Acid
Vitamin E	Zinc	Niacin
Vitamin B1	Copper	Bovatec
Vitamin B2	Cobalt	Benelac
Vitamin B6	Iodine	
Vitamin B12	Selenium	
Vitamin C	Calcium	
Vitamin K3	Magnesium
