

LOOSE-LICK MINERAL SUPPLEMENT - CATTLE

Our experience in dairy production has verified growing heifers and dry cows' future lactation performance, health and fertility are enhanced by sound vitamin/mineral supplementation.

The development of bone, tissue and organs require well formulated vitamin/mineral nutrition, apart from adequate energy and protein for live-weight gain.

Dairytech Nutrition's Loose-Lick Mineral Supplement is formulated to meet these needs under Australian grazing conditions.

Our formulation is weather-proof and easily feed to stock in troughs requiring only weekly monitoring to ensure supply to stock.

Contains Level/kg

**Calcium g 150
Cobalt mg 100
Copper mg 1,500
Iodine mg 80
Magnesium g 50
Manganese mg 3,200
