

COMPLETE MINERAL MIXES

300g feed rate

Dairytech Complete Mineral mixes are designed for those who have grain milling facilities, but not mixers to blend a range of macro and trace mineral premixes into milled grain. The complete mineral mix contains the Dairytech 25 L premix, plus all essential macro elements of Magnesium Oxide 51g, Magnesium Sulphate 30g, lime 145g and salt 60g. The mix can be added to grain via the grain feed head into the dairy at correct proportions of mineral mix to grain, or alternately, through a separate feed head in the case of rotary dairies administered by timed feed head. The Dairytech Complete Mineral Mix is delivered in one tonne bulka bags, but can be packed in 25 kg bags.
